

Gas tube era

1890 1900 1910 1920 1930 1940 1950 1960 1970 1980 1990 2000 2010

1895 Rontgen discovers x-rays

1896 Becquerel discovers radioactivity

1913 Coolidge invents thermionic tube

1913 Bucky invents anti-scatter grid

1920 Potter improves anti-scatter grid

CT scanner development

1971 First clinical CT scan

MRI scanner development

1980 First clinical MRI scan

Glass plates as detector

Film dominant as detector

Growth of digital radiography

1913 First X-ray film

1923 Duplitzed film

1924 Safety film developed

Mass screening for TB

1902 Curies isolate radium

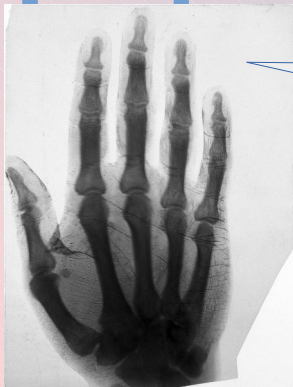

1895 First x-ray

Marie Curie

1896 x-ray

Wilhelm Rontgen

Ultrasound

THE DEVELOPMENT OF RADIOLOGY
